- ❖ Familier with use of AJAX,Jquery

Project Work:

1.Minor Project:

Project Name:NMS(Notification Management System)

Technology Used:PHP,Android Studio,Java,mysql

Problem statement for doing NMS:

        Every organization published its notices to notice board,like college published notices on notice board .The student or members of college who are not in contact with college or who are on leave for some days will unable to see or to get information of events ,notices .Notices may be assignment ,events etc.Some members of college tore the notices so that other s may not get it.

The way problem resolve through NMS Or Description:

  NMS is web as well as android based application that allow organization to flow information in an easy and effective way .Information can be send to individual ,particular part of members.Also it have concept like twitter ,if someone likes like the profile of union of college then he/she get informed about event.Also online attendance through android .

2.Major Project:

Project Name:MIS (Management Information System)

Technology used:ASP.NET ,Android Studio# ,MSSQL,AJAX,JAVA

Problem statement for doing MIS:
Every members in college have records like student have exam record, fee record, library record, progress record,generel record. For example if student have to look after his/her record (exam record, semester wise progress report, library report, fee information (which includes paid fee, due fee last date to be paid) and many more).

The way problem solve through MIS Or Description:
          MIS Is web as well as android based application ,Extension of NMS and added extra features are:

  i.   General Record keeping of members of Organization mainly for college(exam record, general profile, progress of each semester, fee information etc)
 ii.   Access to members for viewing of record through mobile as well as web application
iii.   For student ,students parent can view their child information maintained by college
 iv.   Fee notification (fee to be paid and last date for payment)
  v.   RBAC (Role base access control)Used for distributing data entry problem

              ETC……..

Awards /Motivation:
First prize winner through NMS(Minor project) organized by PACE(project association of Computer and Electronics advanced college of Engineering and Management) named as Techn Bihani 1.0
